1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

This application is in condition for allowance except for the presence of claims 4-7, 11-14, 16 directed to a non-elected species which was non-elected without traverse in the response dated 1/4/2005. **Accordingly, claims 4-7, 11-14, 16 have been cancelled.**

2. It is noted by the examiner that independent claim 17 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 19-22, directed to non-elected species are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of allowed generic claim 17. However, claims 4-7, 11-14, 16, also directed to the non-elected species remain withdrawn from consideration since they do not depend upon or otherwise include all the limitations of an allowed generic claim as required by 37 CFR 1.141.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is

withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. The following is an examiner's statement of reasons for allowance: The prior art of record neither anticipates nor renders obvious the instant combination in an image pickup device having a diaphragm ("light controlling means", cl. 17) that has a shape in the vertical direction that coincides with a shape of light receiving portions of the image sensor so that the diaphragm restricts light along a horizontal direction to prevent light from being incident outside the light receiving portions of the sensor, wherein the diaphragm and the light receiving portions are in a conjugate relationship.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to David L. Ometz at telephone number (571) 272-7593.

A handwritten signature in black ink, appearing to read 'David L. Ometz', with a long horizontal flourish extending to the right.
